Greetings,

This is my first time e-mailing the DOJ in regards to anything. I am so glad that it is about something that is very close and dear to my heart. I am so pleased that the TPA was passed I personally feel that this country must pick it self up and start to get the ball rolling again with this awful slump in the economy. I feel that each and every company has the choice to work their hardest to developed the high-tech industry. It is critical to us all to have a better economy.

I personally feel that Microsoft has been nothing but a whipping boy for no good reason at all. It was a shame that a Judge could be so biased as Judge Jackson was. If that is the kind of judges we have in this country deciding such important issues we are headed for a lot more trouble.

I personally feel that Microsoft has suffered enough through this long court struggle.

This is America the land of the free, so lets allow the high-tech industries the opportunity to innovate & compete, and stop wasting precious time in the courts. Every other company who was on the bandwagon in the class action suit had and has the change to succeed on their own merits and not trying to destroy such a wonderful company as Microsoft who has and still gives us all the best of what a company can give.

I am so pleased that again I was given a chance to express my feelings.

Warmest regards,

Mikki
